Title

Travel Karnataka – Interactive Tour Booking and Destination Exploration Portal

Abstract

Travel Karnataka is a responsive front-end web application that helps users explore popular tourist destinations in Karnataka and book travel packages. The project includes destination search, package booking, dynamic price calculation, image gallery with modal popup, form validation, Local Storage, and Geolocation API.

Introduction

The project provides a simple and interactive platform for travelers to view destinations, compare packages, and make bookings online. It demonstrates modern web development concepts using HTML, CSS, and JavaScript.

Objectives

- Develop a responsive travel website.
- Implement destination search functionality.
- Provide online trip booking.
- Perform client-side form validation.
- Use Local Storage and Geolocation APIs.
- Enhance user experience with interactive features.

Technologies Used

- HTML5

- CSS3
- JavaScript
- Local Storage API
- Geolocation API

Features

- Destination cards (Coorg, Udupi, Mangalore)
- Search destinations
- Travel package booking form
- Dynamic price calculation
- Form validation
- Image gallery with modal popup
- Local Storage for booking data
- Geolocation API integration

Workflow

Browse Destinations

Search Destination

Select Package

Fill Booking Form

Validation

Calculate Cost

Store Data in Local Storage

Booking Confirmation

Advantages

- User-friendly interface
- Responsive design
- Interactive functionality
- Client-side data storage
- Easy navigation

Future Enhancements

- Database integration
- Online payment gateway
- User login and registration
- Hotel booking feature
- Admin dashboard

Conclusion

Travel Karnataka successfully demonstrates the use of HTML5, CSS3, JavaScript, form validation, browser APIs, and responsive design to create an interactive travel booking prototype. The project provides a simple and effective solution for exploring destinations and booking travel packages.
